

CPEC – SEEN FROM THE PRISM OF AN INVESTOR

CONNECTIVITY

Around 2,500 km transport & communication backbone network, from the port of Gwadar in Pakistan to the City of Kashgar in China with its secondary route alignments spread across Pakistan & beyond its borders shall integrate businesses & people inculcating social, economical, cultural & political harmony, both, in the country & the region.

ENERGY & INFRASTRUCTURE

Establishment of number of energy projects shall make Pakistan self-sufficient in its energy needs, leading to energy balancing & trading in the region, where-as, the Infrastructure projects will enhance the mobility of goods & people in Pakistan & beyond its borders.

SPECIAL ECONOMIC ZONES (SEZ)

Over 30 SEZ being established all over the country offering incentives, to local & foreign investors, shall facilitate 'Ease and Cost of doing business' to spur industrial & commercial activities in Pakistan and the region.

VALUE ADDITION TO THE ASSETS OF PAKISTAN

The connectivity, energy projects, infrastructure & the SEZ, all put together on the soil of Pakistan, are the assets available to be capitalized by all businesses & all countries promising enhanced market accessibility and opening to new markets in a region driven by vibrant emerging markets.
